

| Different Cases        | Switches         | Status | Notes for a better understanding of program behavior  |
|------------------------|------------------|--------|---|
| 01 –Combine (default)  | C:\Temp\ALL.pdf  | OK     | (files are combined in one file named All.pdf)  |
| 02 -Combine (default)  | C:\Temp\<FX>     | OK     | (files are combined and get the name of the first file in the tree)   |
| 03 -Combine (default)  | C:\Temp\<T>\<FX> | OK     | (files are combined and get the name of the first file in the tree, and placed in a directory which gets the name of first directory in the tree)         |
| 04 -Batch Process      | C:\Temp\ALL.pdf  | OK     | (files are batch processed and all get the same name All.pdf > they overwrite one another)  |
| 05 -Batch Process      | C:\Temp\<FX>     | OK     | (files are batch processed and all get their original file names)   |
| 06 -Batch Process      | C:\Temp\<T>\<FX> | OK     | (files are batch processed and all get their original file names, and placed in directories which all get their original directory names)                 |
| 07 -Merge by Directory | C:\Temp\ALL.pdf  | OK     | (files are merged by directory and all get the same name All.pdf > they overwrite one another)  |
| 08 -Merge by Directory | C:\Temp\<FX>     | OK     | (files are merged by directory and get the names of their respective directories)   |
| 09 -Merge by Directory | C:\Temp\<T>\<FX> | OK     | (files are merged by directory and get the names of their respective directories, and placed in directories which all get their original directory names) |
